

Services To All Districts

The San Joaquin County **Special Education Local Plan Area (SELPA)** is made up of 10 school districts as indicated in this brochure. Support is provided to these districts upon request and may include consultation and/or direct service. An important function is to act as an interagency liaison and bridge between community resources and student needs.

San Joaquin County SELPA, one of three in San Joaquin County, has been in operation providing support since 1981. There are currently close to 7,200 students with identified special education needs within the SELPA region, ranging in age from birth to 22. Staff and services available include but are not limited to the following:

Program/Educational Specialists may be requested to consult with teachers/administrators on individual students providing technical assistance regarding Individualized Education Program (IEP) or Individual Transition Plan (ITP) development; behavioral interventions; curricular resources and program recommendations. Networking and staff development are major components and are provided at the District, SELPA, and Regional levels.

Psychologists consult regarding special education issues and Student Study Team functions in small districts and court schools. They provide assessment and follow-up recommendations, for students referred for special education services in county programs, court schools, and small districts. The Psychologists may furnish counseling to students with special education needs in the county special education programs and small districts.

Career Vocational Staff provide consultation to school site staff in areas of vocational screening, career exploration, life skills curriculum, and community based instruction. Information on local resources such as public transportation, the Department of Rehabilitation, Social Security Administration, Work Force Investment Board and Valley Mountain Regional Center is also available. Job training and coaching to assist with work skill development may be provided to students through the Workability I Grant.

MIS (Management Information System) is the computerized system that tracks all special education students and services in the consortium. The MIS provides mandated information for state and federal reports generated from the districts.

How To Access

If you need assistance regarding services, consult your District Special Education Administrator listed in this brochure.
